

TABLE 4

## Summary of the Results of Other Trials

Comparison	Drug	Overall Summary of Efficacy	Comments
Other Drugs Compared with Placebo	clonidine propafenone sotalol  mag sulfate dilt/dig betax/dig labet/dig	2 of 2 successful comparisons 2 of 2 successful comparisons 1 of 1 successful comparisons at rest and exercise  1 equivocal trial 3 of 3 successful comparisons 2 of 2 successful comparisons 0 of 1 successful at rest, but effective with exercise	Success defined here as improved control at rest or greater number reaching target heart rate
Drug Combinations Compared with Digoxin	dilt or ver with digoxin sotalol with digoxin nad./dig; xam./dig; betax/dig labet/dig mag sulfate/dig double dose of digoxin amiodarone/dig	7 of 8 successful at rest; 5 of 6 successful with exercise 2 of 2 successful comparisons 3 of 3 successful comparisons 0 of 1 successful comparisons 0 of 1 successful comparisons 1 of 1 successful but more ventricular pauses 1 of 1 successful comparisons	Success defined here as improved control at rest or greater number reaching target heart rate
Other drug-to-drug Comparisons	described in the text		

Dilt denotes diltiazem; ver, verapamil; mag, magnesium; xam, xamoterol; tim, timolol; nad, nadolol; betax, betaxolol; labet, labetalol.
