

TABLE 3

### Postintervention Prostate Cancer Screening Beliefs

Survey Item	Experimental Group (n=122) Response %	Comparison Group (n=135) Response %	<i>P</i> *
How often do you think the DRE together with the PSA blood test could miss some prostate cancer?			
A lot	2	0	
About half	6.5	5	
A few	85	75	
None	6.5	20	<.01
How often do you think the DRE together with the PSA blood test could suggest that cancer is present when in fact no cancer can be found after more testing?			
All of the time	3	2	
Most of the time	12	7.5	
About half of the time	6	4.5	
A little of the time	78	77	
It never makes a mistake	1	9	<.05

DRE denotes digital rectal examination; PSA, prostate-specific antigen.

\*Chi-square analysis was used to test for the differences in the response categories between experimental and comparison groups.
